

Your ageing workforce what you need to know

47% of the NHS workforce are now aged 45 and above¹

The average age of the NHS workforce is 43 and predicted to increase²

The 2015 NHS Pension Scheme normal pension age is linked to the national state pension age³

More than a third of people aged 50+ want to work part-time or have flexible hours before retiring⁸

Common misconceptions:⁹

Fiction

Older people have more instances of sickness

Younger people perform better than older people

When you retire you stop work altogether

Fact

Older workers on average have fewer instances of sickness absence

Older workers with up-to-date training and good health can perform just as well

There are lots of different ways to retire gradually

70% of 2015 NHS Pension Scheme members will have a state pension age of between 65 and 68⁷

41% of community nurses, health visitors and district nurses are over 50 years old⁶

Workers aged 50+ are less likely to access training and development opportunities than their younger counterparts⁵

In the next 10 years there will be 700,000 fewer people in England aged 16-49⁴

TO DO LIST

- Take steps to understand the age demographics of your workforce
- Look into the implications of an ageing workforce on the delivery of safe and effective care in your organisation
- Plan how you can support the health, safety and wellbeing of your staff throughout their longer working lives
- Decide what you need to do to make sure the ageing workforce is recognised in workforce planning
- Learn about how you can use the NHS Pension Scheme flexibilities to support a longer working life
